

Design directions

Intelligent and creative composition of individual elements, and keen attention to detail are the key to transforming a beautiful outdoor space into a spectacular one. WORDS Claire Watkins

MATERIAL WORLD

Mixing various materials together in the outdoor space adds a new layer of interest in the form of different textures, colours and dimensions. The contrasting palette in this garden sees the use of clean, minimalist honed aggregate on the alfresco floor, Bluestone surrounding the pool, jarrah decking, natural travertine-clad planter boxes, and a custom-made travertine and cedar bench seat. Combined with the lush lawn and plantings, its effect is impressive. *Principal Landscapes* 0402 902 346, www.principallandscapes.com.au.
